

Section 19 PoPI Compliance

The purpose of the **PoPI Act** is to ensure that all South African institutions conduct themselves in a responsible manner when **collecting, processing, storing and sharing** another entity's personal information by holding them accountable should they abuse or compromise your personal information in any way.

Ignorance of the law is no excuse

Incorporating PoPI into the day-to-day operations of a business will require a significant amount of time and effort, including educating and training staff, updating business processes and implementing or updating technology.

Ensure that your Section 19 security measures on integrity and confidentiality of personal information are in place with IT Anywhere.
