

ENDPOINT DETECTION & RESPONSE [AI/AV]

IT Anywhere Endpoint Detection and Response [EDR] prevents, detects, and responds to ever-changing threats and recovers quickly when ransomware or other exploits strike.

Remediation and rollback help reverse the effects of an attack and restore your Laptop, Desktop or Server to their pre-attack healthy state to minimise your business downtime.

PREVENT CYBERATTACKS

- Help protect against the latest threats without waiting for recurring scans or updates.
- Respond to threats at the endpoint in real-time
- Policy-driven protection customised for your environment i.e. blocks USBs and endpoint traffic

DETECT THREATS WITH BEHAVIORAL AI

- Easily determine how and when an attack started
- Detailed information about threat actions taken; Alert, Kill, Quarantine, Remediate and Rollback
- Presentation of key risk findings and executive insights via customised reports

RESPOND EFFECTIVELY THROUGH AUTOMATION

- Automated responses for quick threat containment
- ITA will remediate attacks by reversing the effects
- ITA will Rollback any attacks by replacing compromised files with pre-attack healthy versions
