

PROACTIVE MANAGED

A True IT Partnership - An IT Partner, not Provider

CompTIA found 46% of current users of Managed Service Providers have reduced their IT expenditures by 25% or more, with 13% experiencing 50% or more IT savings.

We understand why your critical business services are so important to your daily operations. This is why we spend so much time aligning our technology to support your initiatives. Building a program that relies on 24/7/365 network monitoring coupled with an aggressive preventative maintenance component ensures optimum uptime for your business.

“This program perfectly suits my business needs and ensures we have optimum uptime to avoid affecting our business.”

A. Pereira, Senior IT Manager Bolt & Engineering Distributors (250 Workstations and 10 Servers)

One of the major challenges in maintaining a computer network is trying to predict what will fail and when. With our Down to Business Services solution, we can prevent many network failures from ever happening. By combining regular and comprehensive preventative maintenance and robust real-time monitoring of your critical network and desktop devices, we ensure the reliability and stability of your IT assets.

This solution is so effective that our customers see almost immediate results. A regularly maintained network means fewer failures, yielding higher productivity and savings on support costs for you. At the same time, your exposure to security risks is dramatically lessened, and frustration from unstable IT resources almost vanishes. We allow our customers to focus on their core business functions by taking the worry out of owning a computer network.

Do these issues plague your business?

Network Neglected? Is yours perceived as a “necessary evil” and not an integral part to improving business performance?

Downtime Impact? Are IT outages distracting your staff from their core focus, or prohibiting them from working efficiently?

Distracted Employees? Do your staff rely on other non-IT employees to deal with distracting IT problems?

Program Advantages:

Increased Productivity: Continuous insight into your network lets us reduce the business impact of IT failure by shortening the time from network failure to issue resolution

Reduced Business Impact from IT Failures: Combining preventative maintenance and remote monitoring means we minimise failures that could impact your business. Your network behaves in a stable and reliable manner

Reduced Network Downtime Through Proactive Maintenance: Through regular, preventative maintenance activities designed to keep your network operating efficiently, we reduce the number of emergency incidents you encounter

Proactive Security	<ul style="list-style-type: none"> Antivirus Monitoring and Management Antispam Monitoring and Management
Proactive Network	<ul style="list-style-type: none"> Router/Switch Performance Monitoring

Program Features:

24/7 Advanced Performance

- Monitoring ensures all of the critical network devices that comprise your small business network are healthy and functioning reliably and optimally

Scheduled Preventative

- Maintenance ensures that your servers, PCs and other vital network devices function optimally. This improves reliability and security

Quarterly Network Health

- Review dedicates time to review reports and issues that are important to the ongoing performance of your network. We translate technology into business

Security Management

- uses properly designed and implemented Antivirus and Antispam solutions to keep your business protected

Patch Management ensures

- all of your Windows servers and PC's have the most up-to-date security and system patches, helping to optimise performance and minimise security risk

Network Operations Center:

- Our NOC team is available to assist with all your support needs, delivering support remotely and actively monitoring your systems for critical failure
